

## Press release No.: 1180 - en // Iggesund Paperboard AB // 11 December 2019

### BTG to supply online kappa analyzer to Iggesund Paperboard AB

Igesund Paperboard AB decided to opt for an online Fiber Kappa analyzer from BTG to measure fiber kappa at the outlet of the continuous digester of the hardwood fiberline of its integrated pulp mill in Iggesund, Sweden.

Online Kappa analysis at the digester blowline is performed under extreme process conditions and the measurement is critical for the control of the cooking process. BTG has a proven capability of providing highly reliable Kappa measurements using Single Point Kappa technology operating 24/7 with significantly higher frequency of measurements compared to a traditional multipoint Kappa analyzer. Today, over 150 units of these state of the art reliable fiber kappa analyzers are running globally, allowing BTG customers to optimize their costs.

**Igesund Paperboard** strives to inspire next-century packaging with sustainable paperboard products, services and advice that enhance the value of world-class brands. The market-leading Invercote® and Incada® brands are used by some of the world's most demanding luxury brand owners. Outstanding characteristics include superior durability, excellent color reproduction, whiteness that does not fade, taint and odor neutrality and design versatility. Established in 1685 and part of the Holmen forest industry group, the company relies on its own sustainably managed forests to ensure a renewable material for centuries to come.

**BTG Group** is a multinational provider of integrated, highly specialized process solutions for the global pulp and paper industry. BTG is committed to help its customers achieve significant, sustainable gains in business performance.
